

MUSIC PLAYER APP

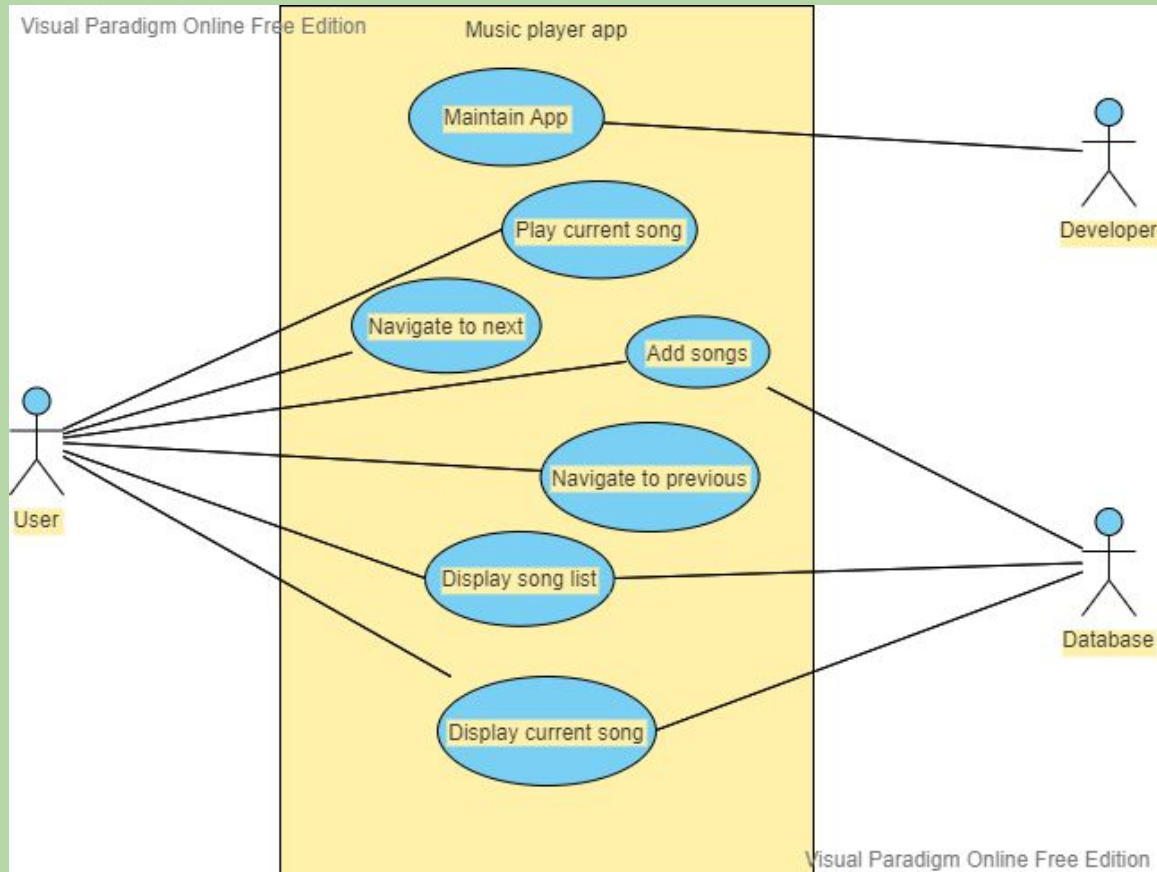

- By Nidhi Prakash
Injeel Fatima

Introduction

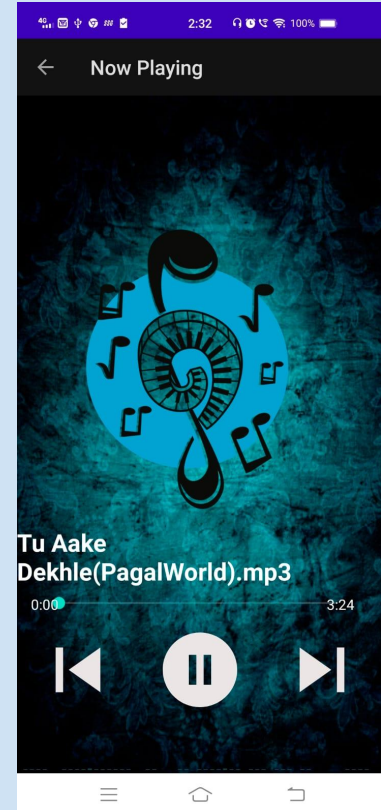

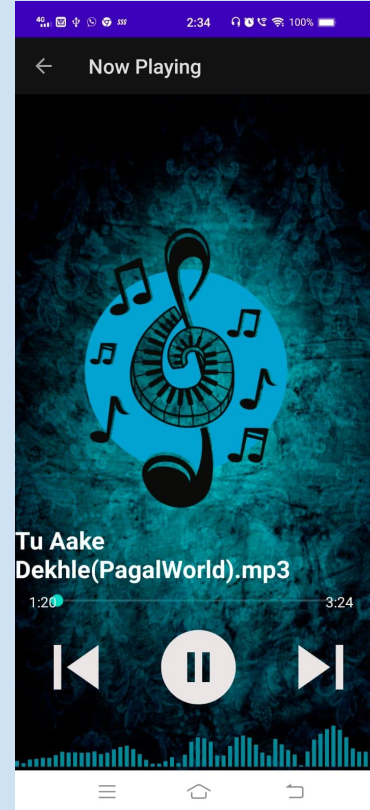

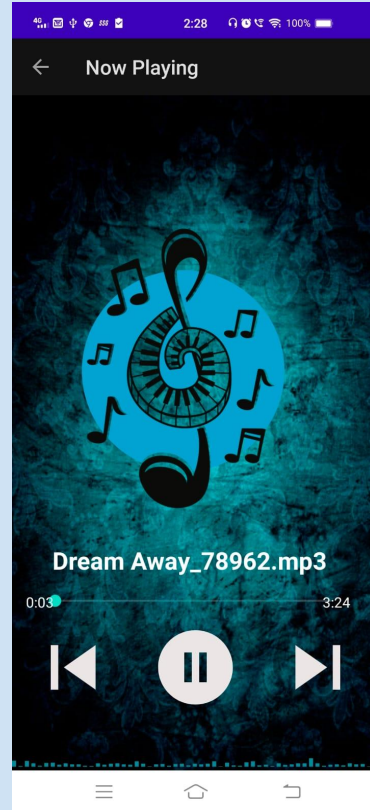

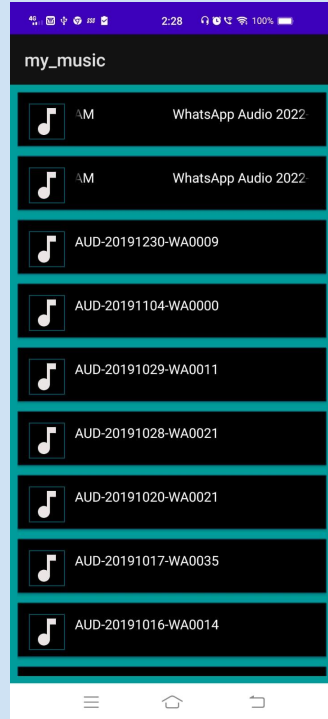

Music is a part of every person's life. No matter what your mood is, you have a song to sustain that mood. If you wish to play your desired songs on Android devices, you need a music player. So, through this article, we will try to build our music player app using Android.

The music player app that we will develop in this article would allow the users to play the songs present on the device. You can download songs on your device and then use the music player to play those songs. Let's see the quite exciting features that you get along with this app.
